

# Payment System Payment System

Payment System technologies are innovative and effective tools for addressing transportation challenges in a cost efficient manner. These technologies have the potential to improve safety, efficiency and mobility and to optimise the use of existing capacity, thereby deferring the need for costly capital expansion.

Payment System include the application of advanced information processing, communications, sensor and control technologies and management strategies in an integrated manner to improve the functioning of the transportation system.

Under Payment System Solutions, TERAS offers include Toll Management System, Parking System and Integrated Ticketing System for Public Transportation.

Zabihil Zikri Mohammad  
Head of Payment Systems
